

The Board of Public Works will be flushing fire hydrants on Tuesday, November 4, 2014, and Wednesday, November 5, 2014. The flushing of the hydrants on the town side of Lewes will be conducted on Tuesday, and those on the beach side of Lewes will be conducted on Wednesday.

During these two days, it is respectfully requested that the Citizens of Lewes take the following precautions due to the possibility that deposits of rust in the water mains may be disturbed:

Put aside an ample supply of water for drinking and cooking.
Refrain from using automatic washers and dishwashers.
Water pressure may be low during this time period.

If you should have discolored water please leave your water run for a few minutes.

We urge you to note these dates on your calendar.
